

# GR5

**DEGREASER**

## Company Profile

## ABOUT GR5 DEGREASER

**GR5 Degreaser** is a company that has, over the past 5 years, strived to perfect its cleaning product, and meet all the required standards and conditions required in most industries.

We have managed to produce a **water based** degreasing product that is literally cleaning up the industry. We are therefore extremely proud of having produced an **ENVIROMENTALLY FRIENDLY, NON-TOXIC, NON-CARCINOGENIC, NON-FLAMMABLE, BIO-DEGRADABLE and ANTI-BACTERIAL** product that is taking the world by storm.

Apart from removing and cleaning the most severe grime, grease and oil from the worst ships, mining equipment, trucks, etc., the same product can be used, diluted or undiluted, in an operating theatre, a restaurant, or simply washing dishes in a domestic kitchen. Our product was sent to **Food Consulting Services (Pty) Ltd**, (SANAS), and put through stringent tests to establish whether it would be acceptable to use in the food industry. It passed with flying colours, attaining a kill rate of 100% of *E.coli*, *S.aureus* and *Aspergillus*, amongst others.

A sample of the GR5 product was sent to the SABS to be tested as water based Multipurpose cleaner and degreaser and for use in the food industry. The results were positive as a water based cleaner. A kill rate of 99.9% of *E.coli*, *S.aureus* and *Aspergillus* were attained. **SEE TEST REPORTS**

**GR5** has also been endorsed by one of the leading independent industrial Chemists in the country, Mr. Charles Marais, as being an Eco-Friendly solution to our planet.

One of **GR5's** proudest attributes is that it is a locally manufactured product, with the main factory being in **Unit 8, N4 Gateway Industrial Park, Willow Park Manor, Pretoria, South Africa.**

It is currently patent pending and Trademarked.

## GR5 CUSTOMER BASE

**G**R5 is proud to have a broad base of customers.

### Set Contract:

**Supply Mr Clean SA throughout South Africa with GR5 Multipurpose cleaner and degreaser**

➤ **CLIENT REFERENCES: ON REQUEST**

## INSTRUCTIONS & GUIDELINES FOR USE / APPLICATION

The following is a simple list of guidelines and instructions for the use of GR5 Degreaser. Although you can clean grease, oils and other grimes off your hands with GR5, please note that your hands must be thoroughly rinsed with water **immediately** after cleaning. Please don't leave GR5 on your hands **to dry**. GR5 is a degreaser so it will remove your skin's natural oils.

Please refrain from contact with skin for any long period of time. When applying GR5, you will notice that it requires absolutely minimal quantities to perform its task of cleaning. Once sparingly applied / sprayed / rubbed on, the product should be agitated, i.e., lightly rubbed with a brush or cloth.

Because of the amazing cleaning abilities of GR5, the product could / should be washed off with water / wiped off with a cloth after a few seconds. However, the thicker / older the grease, or whatever the product is that is being cleaned, the longer the GR5 should remain on before removing / washing off.

Applying the GR5 to a vertical surface may require slightly more of the product, as the product may run off the wall / object being cleaned. Agitate sooner and you may also have to apply twice before removing / washing off.

It is certainly preferable to apply this product using normal washing gloves. If you are applying this product with a high pressure hose, then it is preferable to use goggles as well. If the product gets into your eyes, simply wash / rinse your eyes with water.

For any contact of the product with the eyes / nasal passages or anywhere else that irritation may occur, please refer to the MSDS on the container.

For any further information, please contact:
